

Customized, reliable, and robust solution

Customer case - August 2021

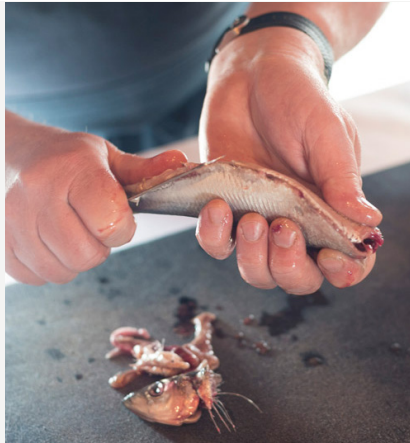

Werner Larsson Fiskeeksport A/S
Skagen - Denmark

Werner Larsson Fiskeeksport A/S is one of Skagen's oldest and most reliable seafood producers rooting back to 1932. The company mainly manufactures herring and mackerel of the finest quality, which is distributed world-wide.

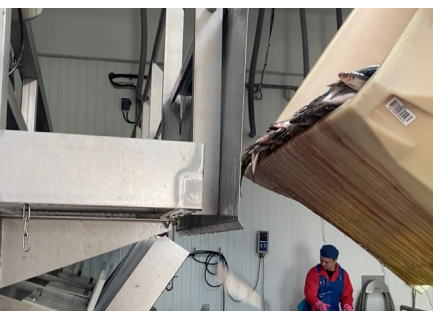

The company is innovative and flexible and adopts accordingly to the increasing demands for healthy and nutritional seafood worldwide.

World-wide export

Werner Larsson's primary markets are Sweden, Holland, Belgium, Germany, Spain, and Denmark – but generally exports worldwide.

THE CHALLENGE

Werner Larsson already had JS Propotec equipment installed at their factory - a lamella pump, which pumps gills to a container.

Recently, Werner Larsson employee René Grusgaard contacted JS Propotec, as they needed a pump suited for pumping of matjes fillet. This should be an upgrade from the current solution: transportation of fish in bins with a forklift.

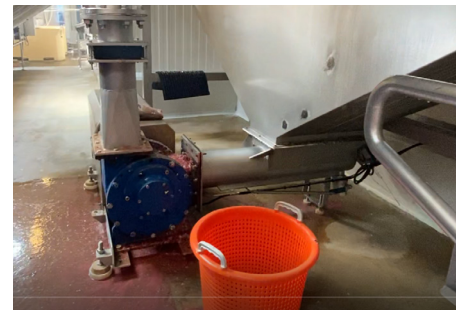

THE SOLUTION

The solution contained:

- 1 pc. standard LAP 250 lamella pump
- 1 pc. Infeed Hopper
- Sketches for piping etc.

A RELIABLE SOLUTION

Really good service!

Werner Larsson is one of JS Propotec's danish customers, and Sales and administration coordinator, Rene Grusgaard says:

– The solution from JS Propotec has optimized our processes, and it saves us the time transporting the fish in bins with forklifts. Now the fish is pumped 80 meters in pipes instead.

And he continues:

– Project and order management went seamlessly, and we experienced a very professional approach, quick delivery, and afterwards good service. All in all, a recommendable cooperation.

The customer says:

René Grusgaard, Werner Larsson
